Art Unit: 1711

1. Claims 26-97 are under examination.

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 26-97 have been renumbered as 1-72.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- 4. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claim21-72 are rejected under 35 U.S.C. 102(b) as being anticipated by Lan et al (USP 6232388).

 Lan discloses a papacamasis.

Lan discloses a nanocomposite composition comprising a layered silicate material intercalated with an onium ion spacing agent and a matrix polymer. The amounts of these ingredients are the same as those that are claimed in instant claims 21-72. All other limitations of instant claims are also encompassed by the claims of Lan.

Claims 21-72 therefore lack novelty.

It is noted that instant application, is a con. of 09/338222 filed on June 22, 1999 which is a CIP of 08/995178 filed on Dec. 22, 1997. Lan et al claims priority of Aug. 17, 1998. Instant application can claim the priority of only June 22, 1999. Hence Lan is a prior art for instant application.

- 6. Claims 1-20 are deemed to be allowable.
